

REFRIGERATION CONTRACTOR WEEKLY

EMERSON
Climate Technologies

It seems everyone is searching for cash that is hiding in plain sight just waiting to be identified, valued, and cashed in. You may have that “found” cash hiding in plain sight in front of you every day. Those old Copeland cast iron compressors sitting in your yard or behind a customer’s building rusting away are worth money, and more money today than ever before.

Just call your wholesaler with model numbers and he will be able to give you a quote for just how much you can get for each old scrap compressor. No model and serial plate? Send him a picture and he’ll get you a quote with just that. Then just drop them at the wholesaler location. No hassle, no freight, no packing, banding, and skidding. Just throw them in the back of the truck when you’re going to the wholesaler anyway. Not even a special trip.

Cash in hand for just picking up the iron. No locker to buy, no dusty attic to crawl around in, no freezing in 32 degree water, no risk at all. This may be the best and easiest deal ever.
