Emerson Inspire™
Programmable/Non-Programmable Thermostat
Homeowner User Guide
Model: 1HDEZ-1521

WHITE-RODGERS HOMEOWNER HELPLINE:
1-800-284-2925

Emerson Inspire™ Features:
• Programming for any schedule (including non-programmable)
• Reminders for seasonal maintenance and changing filters
• Energy saving features that improve comfort
• Interchangeable faceplates to match any home (silver or white)

THERMOSTAT HOME SCREEN DISPLAY AND CONTROLS

1. The **indoor temperature**
2. The relative indoor **humidity**
3. The desired temperature or **setpoint**
4. Selects the **System** setting (see page 7 for more information)
5. Use ▲ and ▼, ◀ and ▶ to change temperature and navigate through menus.
6. M is used to enter any menu function of the thermostat
7. Selects the fan operation (see page 9 for more information)
Navigating through your thermostat menus

Your thermostat features a simplified easy to understand menu structure. Navigating through any menu in your thermostat uses the same approach.

- Press 🔄 to enter the Main Menu
- Highlight a menu item using the ▲ or ▼ buttons
- Enter the item by pressing 🔄
- Use the ◀ or ▶ and the ▲ or ▼ to change menu items and settings
- Press the Home button to display the Home Screen.

- Press 🔄 to enter the Main Menu

Set the Current Time and Date

- On the Main Menu, highlight and enter Clock and Display Settings.
- Highlight and Enter Time and Date.
- Set the time and date using the ▲ or ▼ buttons.
- Press ▶ to highlight Minute, AM/PM, Month, Day or Year.
- Press the Enter button to save any changes you have made and display the previous menu.
- If no button is pressed for two minutes, you will return to the home screen without saving changes.
- The thermostat will automatically assign the correct day of the week after the date is set.
- Press the Enter button when finished.

**NOTE:** If system power is lost for more than eight hours, the clock will have to be reset. Programming and configuration settings will be saved.

**Choose the System Setting**
- From the Home screen, press the button as shown to choose the system setting.

---

**Energy Saving Factory Pre-Program**

Your thermostat is programmed from the factory with the energy saving settings shown below for every day of the week. If this program meets your needs, simply select either **Cool**, **Heat** or **Auto** using the System button and press to begin program operation.

**Factory Pre-Programmed Heating and Cooling Schedule**

<table>

</tbody>
</table>

If you want to change the heating and/or cooling programs in your thermostat, see the **“Programming Your Thermostat”** section.
**System Setting**

Press the System button to choose whether you want your system to be in Cool, Heat, EM or Auto mode.

- **Cool**: Thermostat controls only the cooling system.
- **Heat**: Thermostat controls only the heating system.
- **Off**: Heating and Cooling systems are off.
- **Em**: Emergency setting available only when the thermostat is configured for a heat pump in the system. When selected, system will use only the backup heat.
- **Auto**: AUTO allows the thermostat to automatically select heating or cooling depending on the indoor temperature and the selected heat and cool temperatures. This thermostat will not allow you to program a conflict between Heating and Cooling setpoints.

For example: In the morning heating is required. During the day, the temperature gets warmer and you want the air conditioner to run. The thermostat will automatically change the system mode from heating to cooling.

The temperature you desire in your home can be changed by pressing ▲ or ▼.

**Auxiliary Heating (Heat pumps only)**

If you have a heat pump, your system will automatically activate Auxiliary Heating when the outside temperature is too cold for the heat pump to efficiently heat your home. When Auxiliary Heating is called for, the display will show “Aux” with the Heat icon.
Temporary Temperature Hold

You can temporarily adjust the temperature in your home at any time while your thermostat is running a program by pressing either the ▲ or ▼. Your thermostat will maintain this desired temperature for four hours (default). The display will show “Hold at” by the desired temperature, and “Hold Until” with the time the temporary hold will end. The display will also briefly show “Press ◄ or ► to set the Hold Time”. While this message is displayed, you can change the time that you wish to have the Hold end.

Press the ◄ button to cancel a temporary hold. The desired temperature will display the current program setting.

Permanent Temperature Hold

If you desire, you can set your thermostat to permanently hold a temperature. This feature will bypass any programs you may have set in your thermostat and maintain a constant temperature.

To enter permanent hold, change the temperature with the ▲ or ▼ and press the Hold button. When your thermostat is in this mode, the “Hold at” will be displayed by the desired temperature.

Press the ◄ button to exit and resume programmable mode.
Choosing the Fan Setting (On or Auto)

**Fan Auto** This is the most commonly used setting. The fan will turn on only when the heating or cooling system is running.

**Fan On** You can choose to have the fan running continuously by selecting Fan On.

Maintenance Reminders

Your thermostat can automatically provide reminders for replacing the air filter and humidifier pad, as well as a reminder for when to perform regular maintenance. Each of these reminders are turned on or off and the reminder time period set from the appropriate item in the **Thermostat Settings Menu**.

Maintenance reminders are:

- **Change Filter**
  - Press ▼ to reset Filter Timer

- **Change Humidifier Pad**
  - Press ▼ to reset Pad Timer

- **Service Reminder**
  - Press M for more instructions
  - Press ▼ to clear reminder

When a reminder appears, it can be turned off by entering the Alert Information Detail menu on the Main Menu.

Select **Yes** to “Clear Alert and Reset Timer”.
Clock and Display Settings Menu

In addition to setting time and day on this menu, you can use the Display Settings menu to adjust the screen brightness, choose the background color, select the keypad backlight, and the auto dimmer. Other choices select what will be displayed on the Home screen, Time & Day, Outdoor Temp Display, Humidity Display and Alert Message Area.

On the Main Menu, highlight and Enter Clock and Display Settings

Highlight and Enter Display Settings

Brightness – Use the ▲ and ▼ buttons to adjust between dark and bright.
**Theme** – Choose from alternate background schemes.

**Keypad Backlight** – When selected **On**, the light on the keypad will be on to give the keypad better visibility. If selected **Off**, the keypad light will turn on for a short time when a button is pressed and then turn off again.

**Auto Dimmer** – When selected **On**, the display will change to a darker background during the hours of 10:00 PM to 5:00 AM when no buttons are pressed. If selected **Off**, the display will remain at the same brightness.
Heating Program/Cooling Program

On the Main Menu, highlight and enter Heating or Cooling Program. See Programming Your Thermostat section.

Thermostat Settings Menu

Additional thermostat operating settings are found in the Thermostat Settings Menu.

On the Main Menu highlight and enter Thermostat Settings.

Program – Default is On. Select Off to disable the Heating and Cooling Programs and maintain a constant temperature 24 hours a day.
**Air Filter Maintenance / Humidifier Maintenance / Service Reminder**

Default for each is **Off**. When set to **On**, a maintenance reminder will appear on the home screen when the system has run for the selected amount of time. The length of time for the maintenance reminder can be selected to a setting of 1 to 12 months.

Use ▲ or ▼ to select **On** or **Off**. When **On** is selected, set time of maintenance period using ◀ or ▶.

°F or °C – Default is °F. Select temperature display to be Fahrenheit or Celsius.

**Beeper** – Default is **On**. Turns audible prompt on to indicate when a button is pressed.
Cycle Humidifier – Default if Off. This feature provides an option that reduces the water usage by up to 50% when a flow-through humidifier is controlled by the thermostat. It is recommended for use on flow-through humidifiers only. When turned On, the humidifier will cycle to turn off for 10 minutes after it has run for 10 minutes. The blower and/or furnace will continue to run during the humidifier off period.

Auto Humidity Reduction – Default is Off. When selected, High or Low provides the ability to minimize or reduce the window condensation by reducing the humidity setpoint when the outside temperature is cold.

Comfort or Dehum – Default is Off. When Comf option is selected the temperature is altered by the humidity to reflect the true comfort. When Dehum is selected humidity reduction is maximized by continuing to cool below the temperature setpoint.

EMR (Energy Management Recovery) Default is On. With EMR selected On, the heating or cooling system will start early so the temperature in your home is at the desired temperature at the beginning of the program period. If set to Off, the system will not start until the beginning of the program period.
**Maximum Heat Setpoint Temp.** – Default is **99°**. **Minimum Cool Setpoint Temp.** – Default is **45°**. These settings are the highest temperature limit in Heat mode or the lowest temperature limit in Cool mode. Select a setting of **99°** to **45°** for the maximum heating temperature or **45°** to **99°** for the minimum cooling temperature.

**Temperature Display Adjust** – Default is **0°**. Your thermostat was accurately calibrated at the factory. However, this option allows you to change the humidity or temperature displayed to match other thermostats in your home.

**De-Hum Setpoint** – Default is **95%**. The Dehumidification setpoint is the percent of humidity that the cooling system will try to reach. Dehumidification is accomplished through control of the compressor and speed of the circulator blower.

Adjust the dehumidification setpoint to a value from **40%** to **95%**.

**Humidity Setpoint** – Default is **20%**. Humidity setpoint is the percent humidity that the heating system and humidifier will attempt to maintain in Heating.

Adjust the humidity setpoint to a value from **20%** to **90%**.
Planning your Program

Your thermostat can be programmed in different profiles.

- **Entire Week** (Every day will have the same program)
- **Monday-Friday** (Monday-Friday will have the same program)
- **Saturday-Sunday** (Saturday-Sunday will have the same program)
- **Individual Days** (Each day will have a separate program)

Each day, or group of days, has four different time periods: **Morning, Day, Evening and Night.** Both the Heating and Cooling Programs are programmed the same way.

Keep the following guidelines in mind when planning your program:

- In Heating, lower temperatures will save energy.
- In Cooling, higher temperatures will save energy.
- If you plan on using auto-changeover, do not program your heating temperatures higher than your cooling temperatures.

**NOTE:** To disable the heating and cooling programs (non-programmable), see **Thermostat Settings Menu.**
Entering the Heating & Cooling Programs
(Entire Week program illustrated below)

Entering Heating Program
- On the Main Menu, highlight and enter Heating Program
- Highlight and enter Entire Week
- Press ▲ and ▼ to change the highlighted Time or Temperature to your desired settings
- Press ◀ or ► to highlight the next time or temperature
- Set all times and temperatures for all periods
- When you have completed setting all times and temperatures, press Enter to save and display the Heating Program menu. A checkmark appears to indicate the portion of schedule you have programmed

Entering Cooling Program
After entering Heating Program, press ► to highlight “Switch to Cool Program” and press ▼, or enter Cooling Program on the Main Menu.
Enter Cool program using same procedure.

If programming Monday – Friday and Saturday – Sunday, follow the above procedure.

Using Individual Days allows you to change the program settings of a single day or days. Highlight a day and press ▼ to mark the box. Mark additional days you wish to have programmed the same. Press Set to begin entering the program for the selected day or days.
Alert Info Detail

If the thermostat senses trouble with a component of your system or a maintenance reminder appears, an alert will be displayed on the Home screen. Details of any alert can be found on the Alert Info Detail menu in the Main menu. Your installing dealer contact information may also be displayed on this screen.

There are two levels of alerts;

Maintenance Reminder. The maintenance reminder can be cleared and the timer reset by selecting “Clear Alert Message and reset timer” by pressing the ▶.

Critical System Warnings. If a Red system alert appears, contact your qualified service technician to have your system serviced.
**Reset Operation**

If a voltage spike or static discharge blanks out the display or causes erratic operation of your thermostat, you can reset it.

To reset the thermostat, press ▲, ▼, and System button at the same time.

**NOTE:** When the thermostat is reset, the Thermostat Settings, time and date, and programming schedule will be reset to the factory defaults. Refer to the customized settings for your thermostat recorded on the back cover of this manual. Use this manual to help restore the desired settings before they were reset. For your convenience, the factory default settings are shown.
Record of Thermostat Options Selected

For your quick reference, below are the options selected by your installing dealer to optimize your equipment settings and your personal home comfort preferences. (Contractor to fill in value or check box. N/A = Not Applicable for your equipment or application.)
