Importance of efficient, sustainable, connected cold chain protecting consumers and those who supply them

We’re delivering practical, flexible approaches

Digital Transformation: accelerating the use of data through incremental, expanded adoption of technology

Devices and Components
- Compressors and refrigeration
- Controls and electronics
- Temperature management
- Trackers and loggers

Architecture and Systems
- System design
- Integrated solutions
- Project management services
- Condition status reporting

Enterprise Visibility
- Connectivity and monitoring
- Cloud-based, hosted solutions
- Operational insights
- Compliance management and assurance

Condition Management and Optimization
- Process automation and management
- Preventive and predictive services
- Asset life extension
- New business optimization models (CaaS)

Emerson has solutions for critical areas, applications and markets
